

Introduction

Dear Reader

The Third Edition of this Package of health information provides data as of November 2008. The first edition of this Package of health information published on 2001 and the second edition on 2007.

This package includes data and formal name of Health Facilities, health directorates, primary health centers, hospitals & specialized medical centers in Erbil governorate based on administrative structure.

Furthermore it includes information on the type of health services provided in the hospitals, primary health centers and the distance of these facilities from the main building of directorate of health of Erbil which is located in the center of Erbil city.

In the second edition of this package the location of all health facilities are placed on a map (satellite image map) which you can get access to those maps on our website (www.dohhawler.org). I hope in the near future we could update this map through locating of the new health facilities which were built during the last two years on the map.

Period interval of issuing of this package has been discussed with all relevant departments in the directorate of health and there is a consensus to be updated every two years.

Ultimately I would like to extend my gratitude & thanks to all participants who prepared this package of valuable health information. Many thanks to the planning department and especially to Dr. Moayad Abdullah Wahab, the head of Planning department for his great work for the delivery of this document.

There is no doubt every wishes and dreams can not be reached with out work & there is no work without shortages. We will be appreciated any suggestions for developing and overcoming the shortage or lack of necessary information through sending it to Moabva@yahoo.com .

Many thanks,

Dr. Khalid Ali Abdullah
Director General
Directorate of Health of Erbil
January 2009
